# modern tropical lifestyle

From the developer Farpoint Realty Indonesia, a subsidiary of the Gunung Sewu Group, the Verde condominium represents a new living concept. Strategically tucked within the heart of Jakarta's busy business district of Kuningan, Verde is a green oasis for modern living that offers tranquillity, luxury and elegance.

## enter the sanctuary

Dedicated to a residential environment that offers privacy and security, Verde is not attached to a shopping mall or a block of offices. A porte-cochere arrival zone with natural stone paving is roofed by a canopy of greens and welcomes residents with its lushness while providing essential shade for hot days.
